

Geographic Data Science - Lecture I

Introduction

Dani Arribas-Bel

Today

- This course
- The (geo-)data revolution
- (Geo-)Data Science

This course

Quiz

- Can you think of a real-world context where data and statistics are being used to make a difference?
- Have you ever heard the term "**Big Data**"?
- Have you ever heard the term "**Data Science**"?
- Have you ever written a line of computer code?

More stats than a GIS course, more GIS than a stats course...

More stats than a GIS course, more GIS than a stats course...

...but in a fun way!

Philosophy

- (Lots of) **methods** and techniques
 - General overview
 - Intuition
 - Very little math
 - Lots of ways to continue on your own
- Emphasis on the **application** and **use**
- Close connection to "**real world**" applications

Geographic Data Science

Welcome to Geographic Data Science, a course taught by Dr. Dani Arribas-Bel in the Autumn of 2016 at the University of Liverpool.

The timetable for the course is:

- **Lectures:** TBA
- **Computer Labs:** TBA

Locations

TBA

Contact

Dani Arribas-Bel D.Arribas-Bel@atl.liverpool.ac.uk

Logistics - Format

11 weeks of:

- **Prep. materials:** videos, podcasts, articles... 1h. approx. (most recommended!)
- **1h. Lecture:** concepts, methods, examples
- **2h. Computer practical:** hands-on, application of concepts, Python (*highly employable*)
- **Further readings:** how to go beyond the minimum

Logistics - Content

Logistics - Content

- **Weeks 1-3:** "big picture" lectures + introduction to computational tools (learning curve)

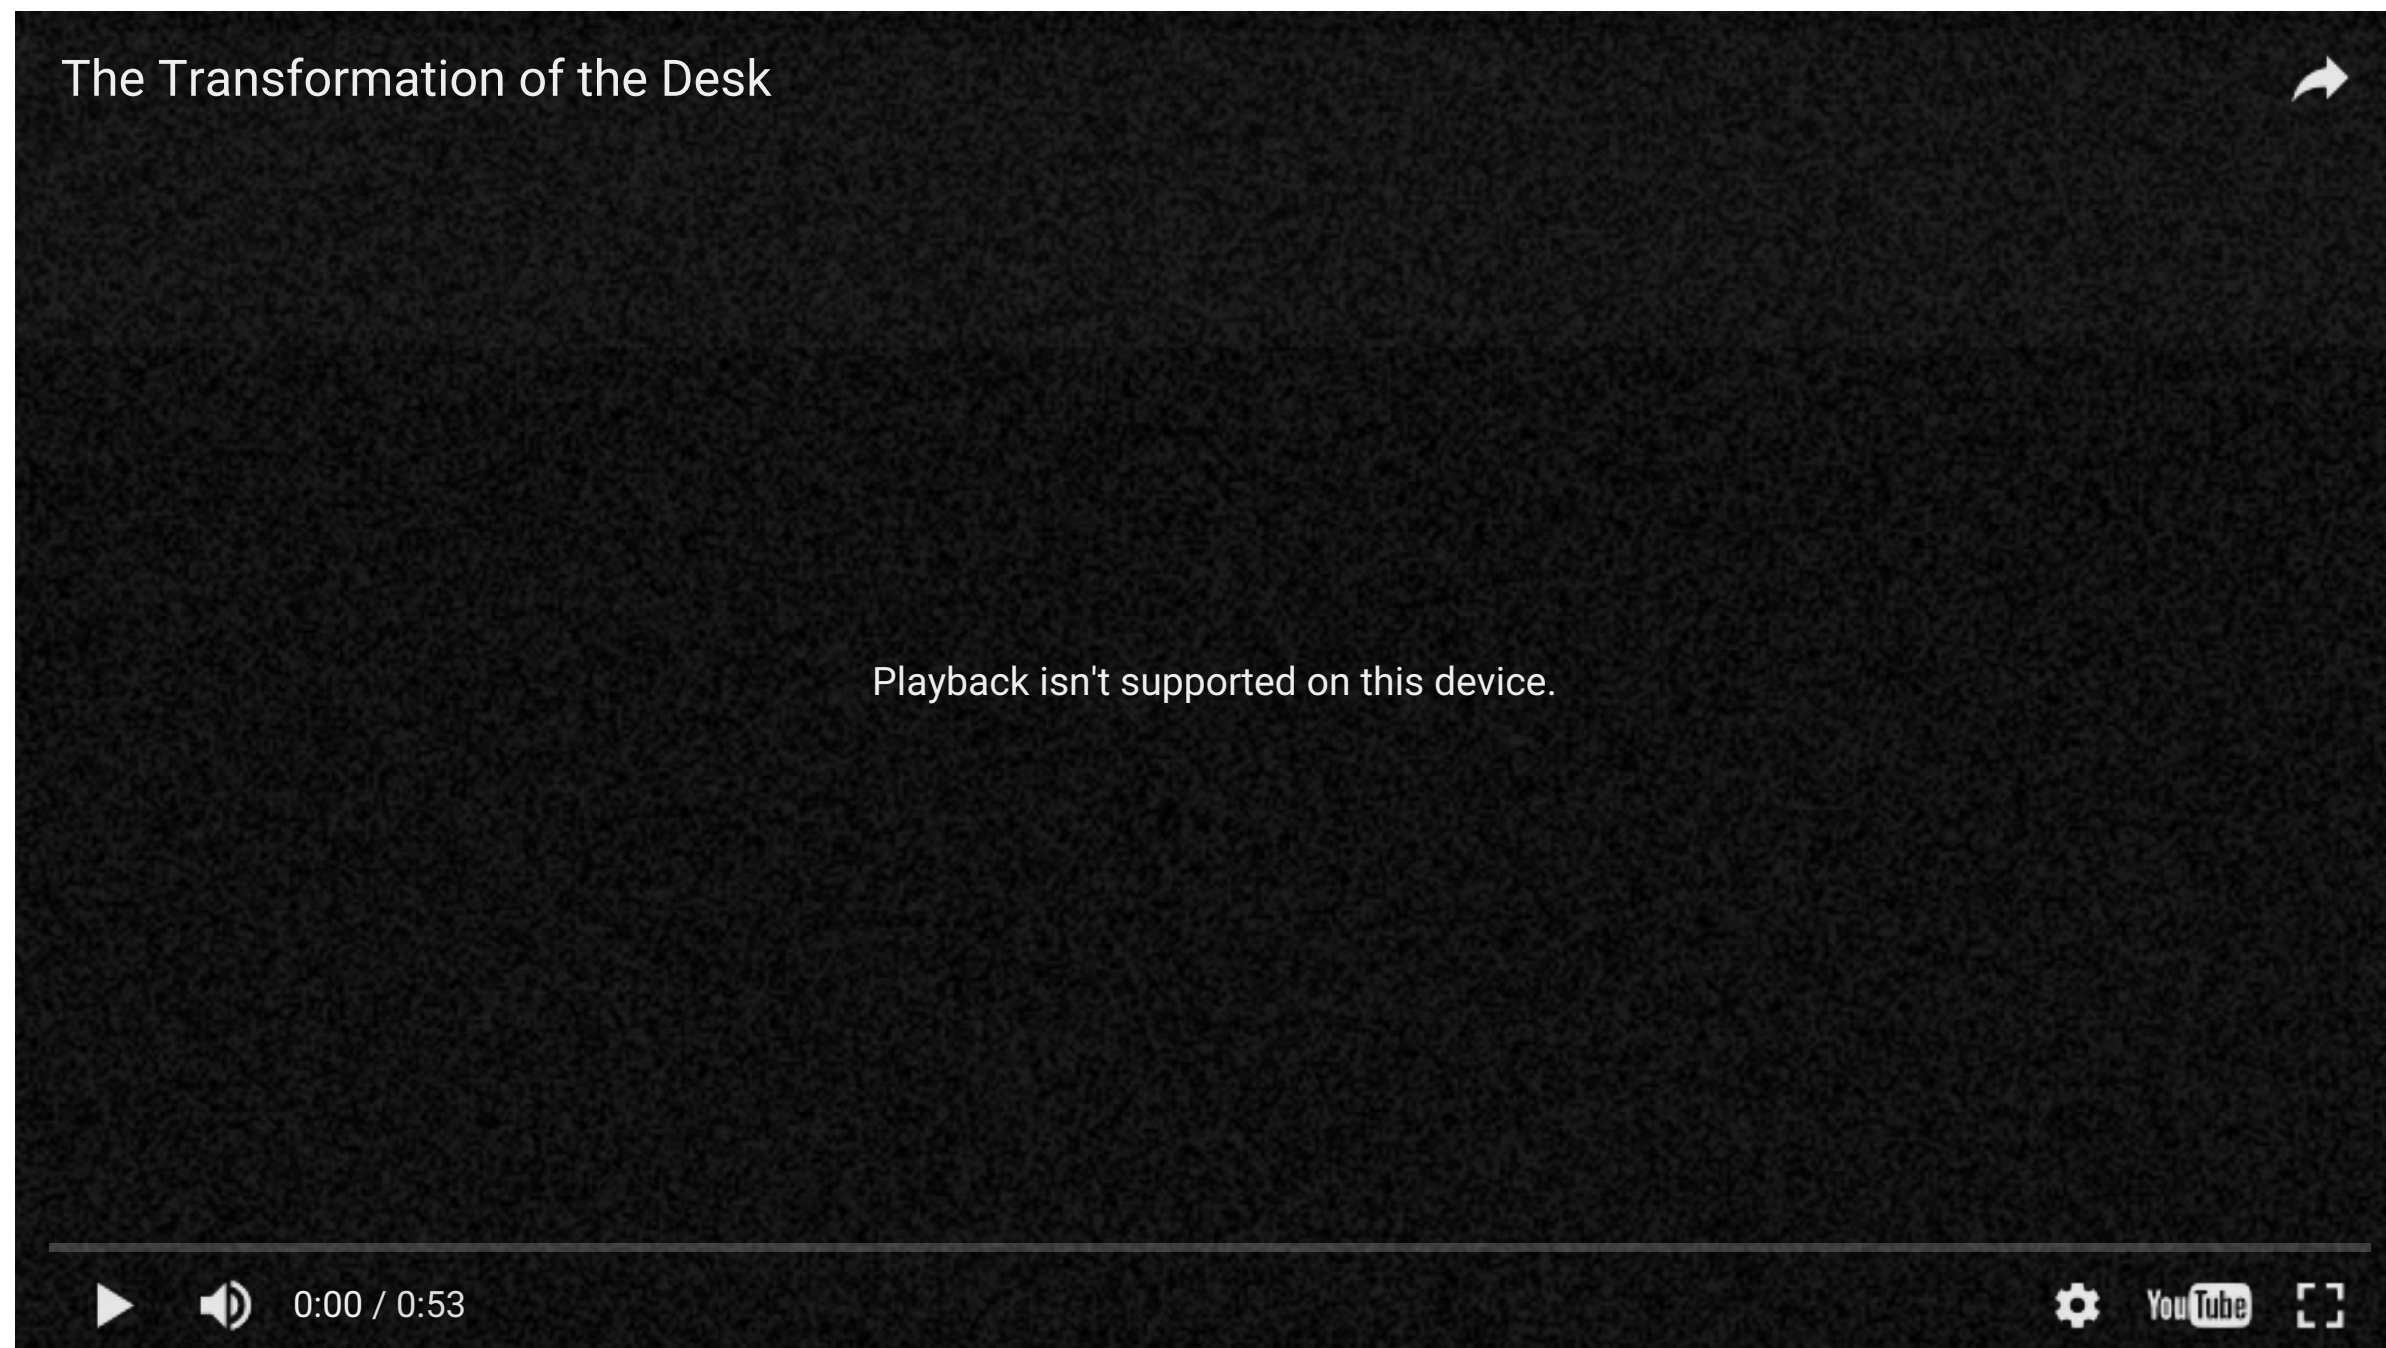

Logistics - Content

- **Weeks 1-3:** "big picture" lectures + introduction to computational tools (learning curve)
- **Weeks 4-8:** "meat" of the course (lots of concepts packed)

Logistics - Content

- **Weeks 1-3:** "big picture" lectures + introduction to computational tools (learning curve)
- **Weeks 4-8:** "meat" of the course (lots of concepts packed)
- **Weeks 9-11:** catch up + prepare an awesome Assignment II

Code

"Even if you won't be a poet, you need to know how to write"

Python

Python

- **General purpose** programming language
- Sweet spot between "*proof-of-concept*" and "*production-ready*"
- Industry standard: **GIS** (Esri, QGIS) and **Data Science** (Google, Facebook, Amazon, Netflix, The New York Times, NASA...)

Self-directed learning (or "*it's all about YOU*")

Prepare for the labs

Self-directed learning (or "*it's all about YOU*")

Prepare for the labs

- I won't be leading/lecturing at the computer labs

Self-directed learning (or "*it's all about YOU*")

Prepare for the labs

- I won't be leading/lecturing at the computer labs
- Go over the notebooks between the lecture and the computer lab --> If the first time you see a notebook is at the lab, you won't be able to follow on

Self-directed learning (or "*it's all about YOU*")

Prepare for the labs

- I won't be leading/lecturing at the computer labs
- Go over the notebooks between the lecture and the computer lab --> If the first time you see a notebook is at the lab, you won't be able to follow on
- Bring questions, comments, feedback, (informed) rants to class/labs

Self-directed learning (or "*it's all about YOU*")

Prepare for the labs

- I won't be leading/lecturing at the computer labs
- Go over the notebooks between the lecture and the computer lab --> If the first time you see a notebook is at the lab, you won't be able to follow on
- Bring questions, comments, feedback, (informed) rants to class/labs
- Use the forum (link on VITAL)

Self-directed learning (or "*it's all about YOU*")

Prepare for the labs

- I won't be leading/lecturing at the computer labs
- Go over the notebooks between the lecture and the computer lab --> If the first time you see a notebook is at the lab, you won't be able to follow on
- Bring questions, comments, feedback, (informed) rants to class/labs
- Use the forum (link on VITAL)
- Collaborate with your peers (it's **NOT** a zero-sum win!!!)

More help!!!

This course is much more about "**learning to learn**" and **problem solving** rather than acquiring specific programming tricks or stats wizardry

More help!!!

This course is much more about "**learning to learn**" and **problem solving** rather than acquiring specific programming tricks or stats wizardry

- Learn to **ask** questions

More help!!!

This course is much more about "**learning to learn**" and **problem solving** rather than acquiring specific programming tricks or stats wizardry

- Learn to **ask** questions (but don't expect exact answers all the time!!!)

More help!!!

This course is much more about "**learning to learn**" and **problem solving** rather than acquiring specific programming tricks or stats wizardry

- Learn to **ask** questions (but don't expect exact answers all the time!!!)
- **Help** others as much as you can (the best way to learn is to teach)

More help!!!

This course is much more about "**learning to learn**" and **problem solving** rather than acquiring specific programming tricks or stats wizardry

- Learn to **ask** questions (but don't expect exact answers all the time!!!)
- **Help** others as much as you can (the best way to learn is to teach)
- **Search** heavily on Google + Stack Overflow

Assignments

- Mark (mostly) based on two assignments, due:
 1. Week 7 (47.5%)
 2. Week 12 (47.5%)
- Coursework
- **Equivalent to 2,500:** report (*notebook*) with **code**, **figures** (e.g. maps), and **text**

The (geo-)data revolution

The (geo-)data revolution

Exciting times to be a:

- Geographer
- Map fan
- Data fan

The world is being "**datafied**"...

"Datafication"

Quantification of phenomena through the systematic recording of data

“taking all aspects of life and turning them into data”

Cukier & (Mayer-Schoenberg)

Examples: credit transactions, public transit, tweets, facebook likes, spotify songs, etc.

"Datafication"

Many implications:

- Opportunities for optimization of systems
(Industrial IoT, planning systems...)
- **Window** into human **behaviour** (this course)
- Issues with **intentionality** and **privacy**
- ...

Why now?

Why now?

Advances in:

- Computing power and storage
- Connectivity
- Geospatial technology

The (geo-)data revolution

The confluence of the three (computing, communication and geospatial) is creating large amounts of data.

Now, **data in itself is not very valuable:**

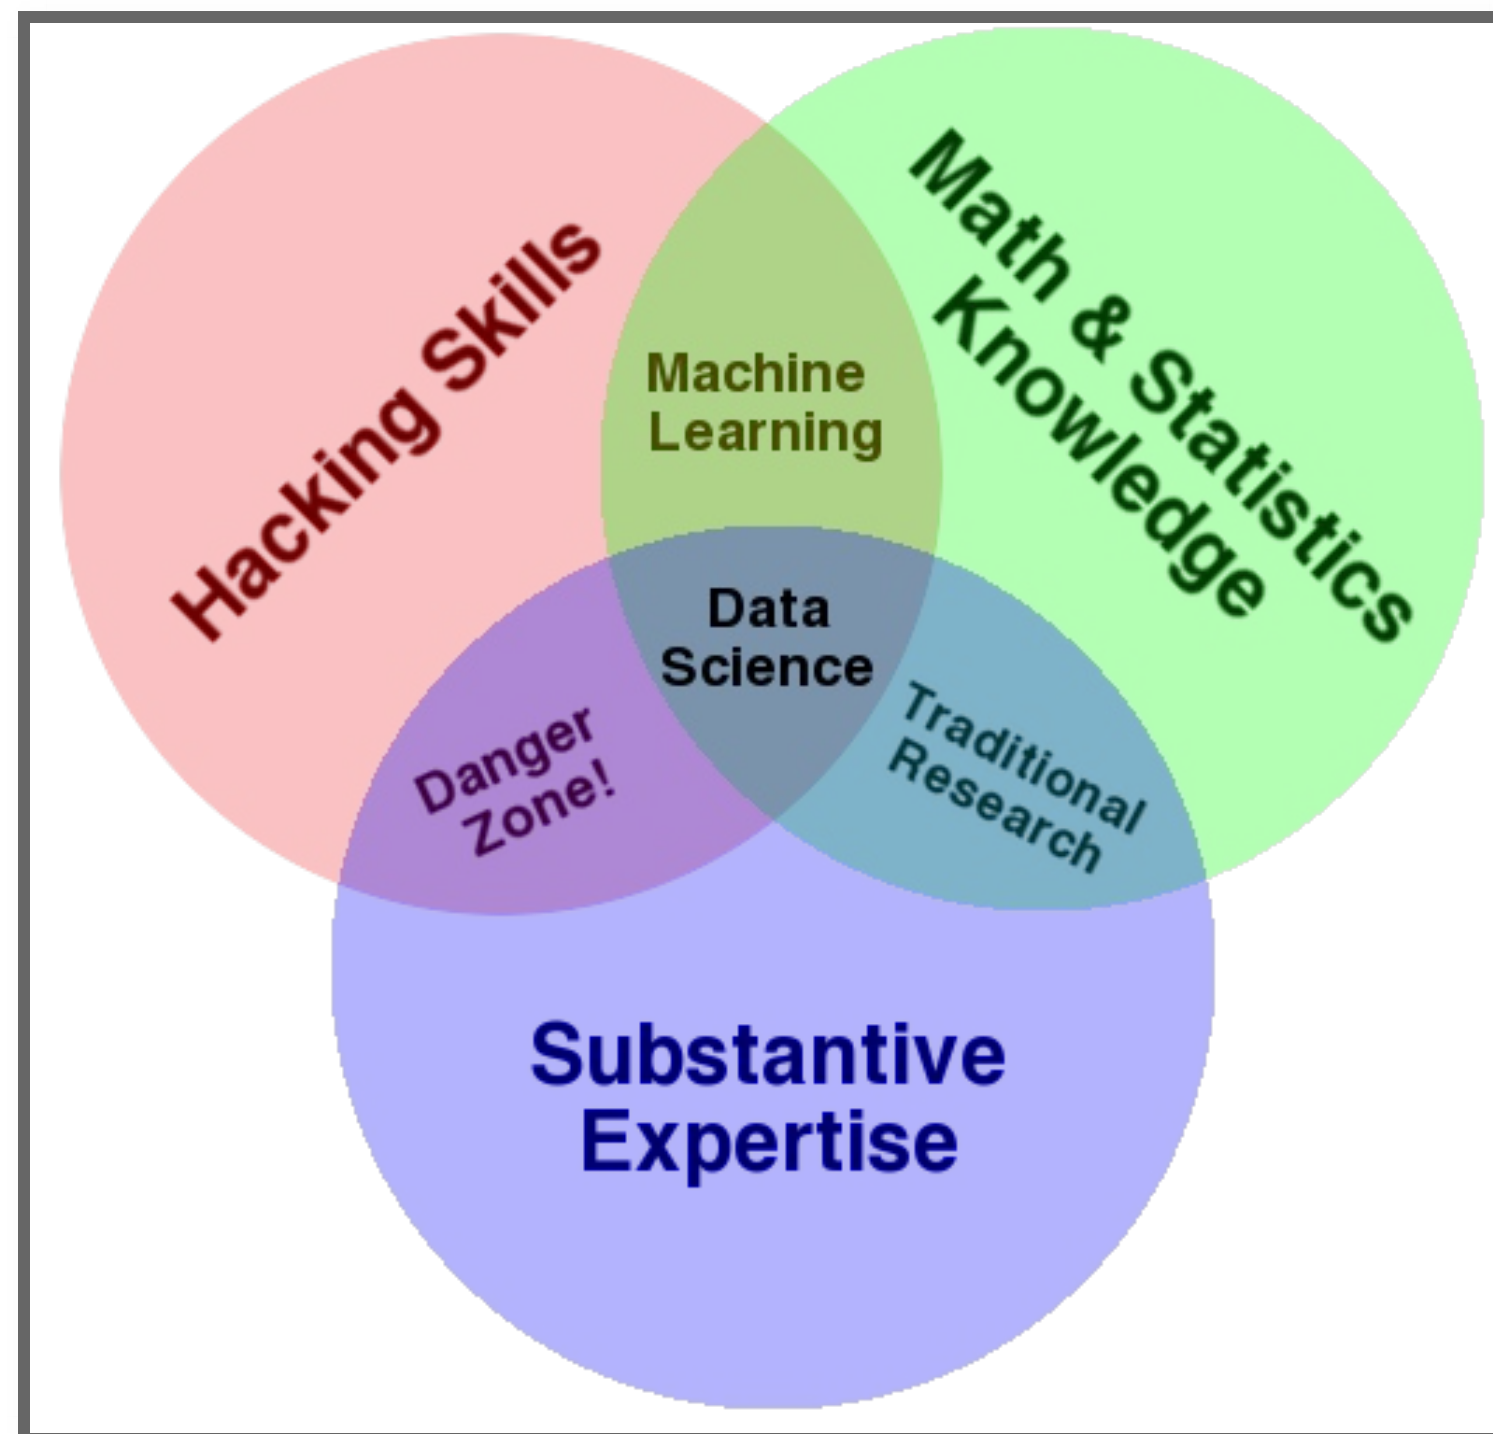

- Data --> Information --> Knowledge --> Action

Data Science

*Methods, tools and techniques to turn data into
actionable knowledge*

Data Science

Geo-Data Science

Geo-Data Science

- A (very) large portion of all these new data are inherently **geographic** or can be traced back to some location over space.
- Spatial is special.
- Some of the methods require an explicitly spatial treatment --> (Geo-)Data Science

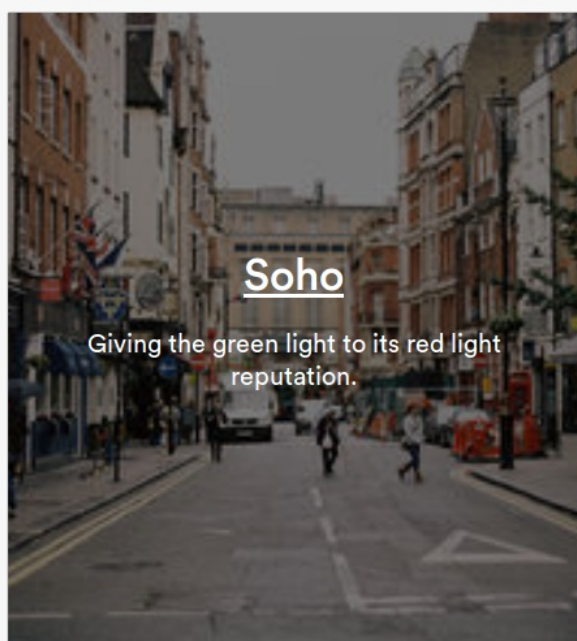

Some examples...

Find a Neighbourhood in London

What kind of neighbourhood are you looking for?

- Dining ×
- Artsy 7
- Nightlife 9
- Shopping 15
- Loved by Londoners 11
- Touristy 14
- Great Transit 13
- Museums & the Arts 10
- Peace & Quiet 7
- Along the River Thames 5
- West End 7

23 neighbourhoods match Dining. [See all listings](#)

Soho

Giving the green light to its red light reputation.

Eclectic • Open-minded • China Town • Lgbt Friendly

Whitechapel/Brick Lane

Gritty outside with gallant insides.

Buzzing • Curry • Arty • Graffiti

Mayfair

Ostensibly decadent evening outings.

Luxury Shopping • Ballrooms • Heart Of London • Fashionable

Chelsea

Bohemians turned businessmen.

Fitzrovia

Commercial-creative hybrid community.

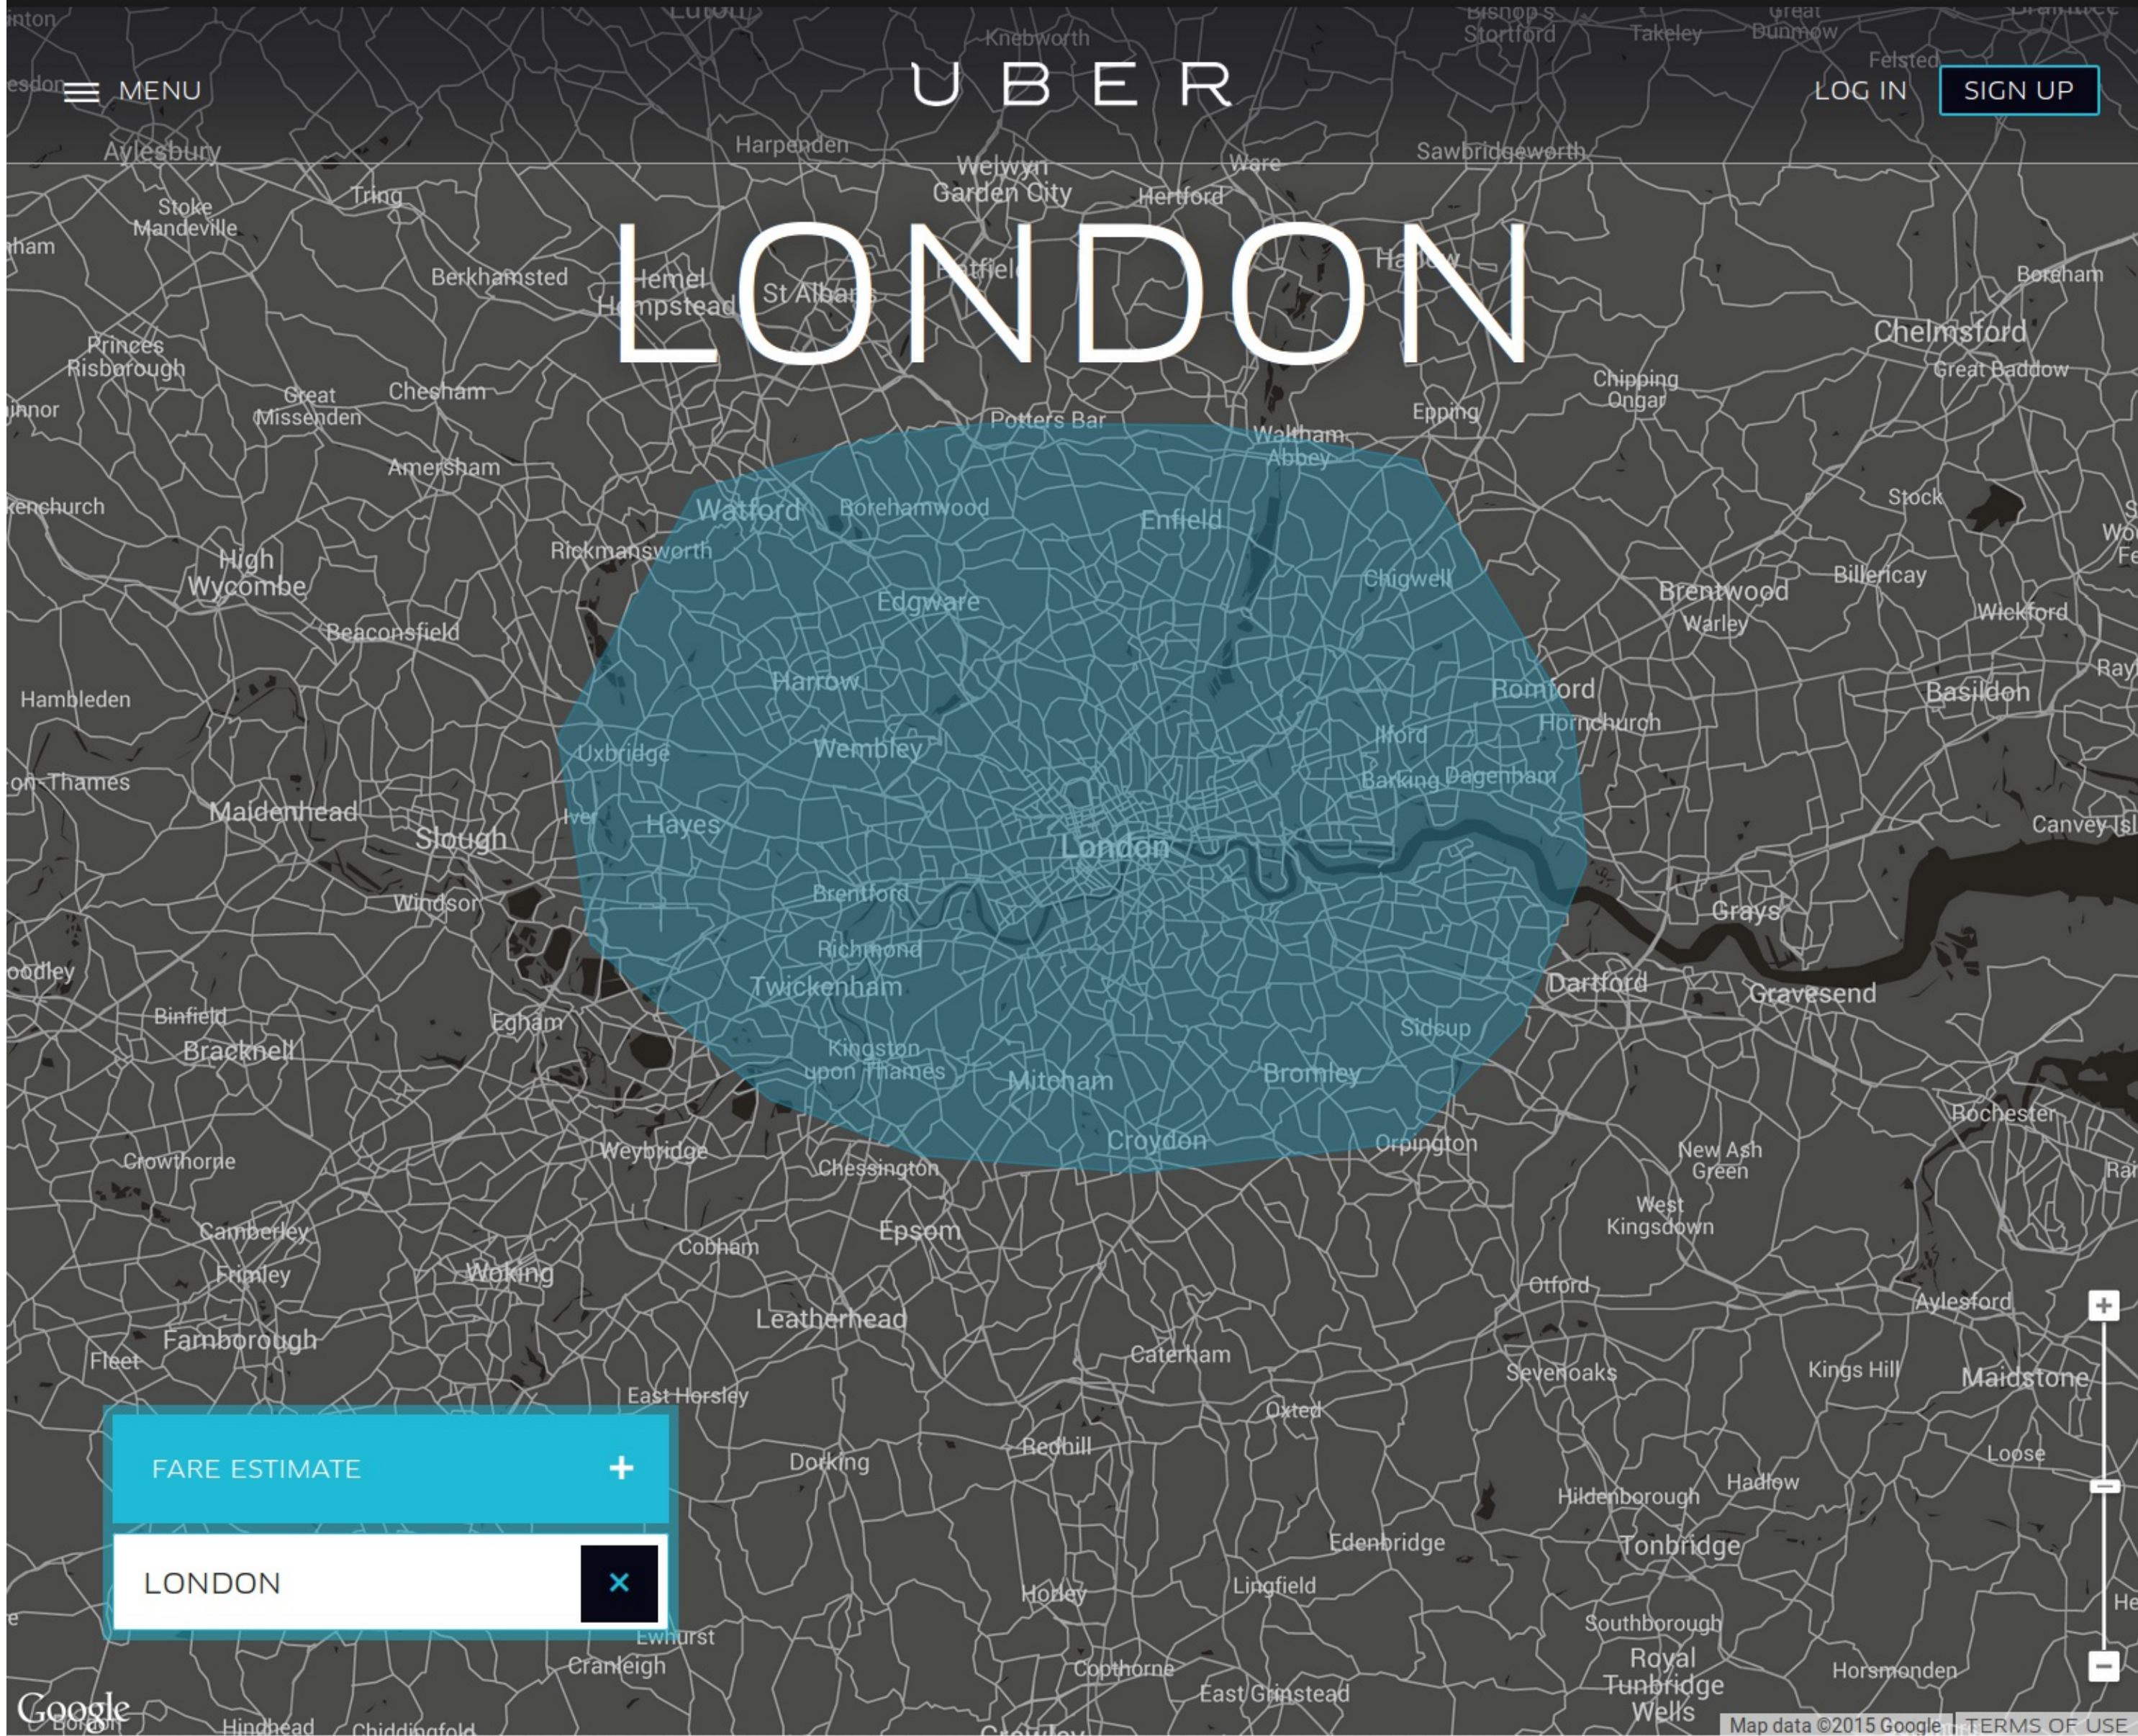

Islington

Fashionable from day to night.
